

#	Test Case	Precondition
Authentication & Access Control		
1	Verify login with correct email and password	Account is registered; user is on the Login page
2	Verify login with an unregistered email	User is on the Login page
3	Verify login with correct email and wrong password	Account is registered; user is on the Login page
4	Verify submission with email/phone field empty	User is on the Login page
5	Verify submission with password field empty	User is on the Login page
6	Verify submission with both fields empty	User is on the Login page
7	Verify two consecutive wrong attempts don't lock the account	Account is registered and not locked
8	Verify third consecutive wrong attempt locks the account	Account has 2 prior consecutive failed attempts
9	Verify login attempt while account is locked	Account is currently locked (3 failed attempts done)
10	Verify login succeeds after the 15-minute lockout expires	Account was locked, and the 15-minute period has passed
11	Verify failed-attempt counter resets after a successful login	Account is registered and currently unlocked
12	Verify password isn't exposed in console/localStorage/network	Registered account with known credentials exists
13	Verify SQL/script injection in login fields is rejected safely	Login page is accessible; account is not currently locked
14	Verify email field is not case-sensitive	Registered with lowercase email
15	Verify login with correct phone number and password	Account is registered; user is on the Login page
Post-Booking Lifecycle Management		
16	Verify already-cancelled booking has no active Cancel option	Patient is logged in and has an already-cancelled booking
17	Verify Cancel button is enabled when appointment is more than 24h away	Patient is logged in and has a booking more than 24h away
18	Verify Cancel button is disabled when appointment is within 24h	Patient is logged in and has a booking within 24h
19	Verify behavior when appointment is exactly 24h away	Patient is logged in and has a booking exactly 24h away

20	Verify Cancel button is enabled just past the 24h mark (24h01m)	Patient is logged in and has a booking 24h and 1 minute away
21	Verify Cancel button is disabled just before the 24h mark (23h59m)	Patient is logged in and has a booking 23h59m away
22	Verify confirming cancellation through the modal updates status	Patient is logged in; Cancel button is enabled on a booking
23	Verify closing the modal without confirming leaves booking unchanged	Patient is logged in; Cancel modal is open
24	Verify slot reverts to Available after cancellation	Patient is logged in and has just cancelled a booking
25	Verify cancelling one booking doesn't affect others	Patient is logged in and has 2 or more upcoming bookings
26	Verify empty state when there are no upcoming bookings	Patient is logged in and has zero upcoming bookings
27	Verify empty state when there are no past/cancelled bookings	Patient is logged in and has zero past/cancelled bookings
28	Verify dashboard state persists after page reload	Patient is logged in and has existing upcoming/cancelled bookings
29	Verify Past/Cancelled tab shows past and cancelled bookings	Patient is logged in and has past or cancelled bookings
30	Verify Upcoming tab shows only future bookings	Patient is logged in and has bookings in different states

Steps	Expected Result	Result	Priority
1. Enter registered email 2. Enter correct password 3. Click Login	User lands on dashboard, session starts	Pass	Medium
1. Enter random/unregistered email 2. Enter any password 3. Click Login	"Invalid email/phone or password." — nothing more specific	Pass	Medium
1. Enter correct email 2. Enter wrong password 3. Click Login	Same generic error as TC-72, no hint about which field was wrong	Pass	Medium
1. Leave email/phone blank 2. Fill password 3. Try to submit	_Field is highlighted/flagged with a required-field error message, and submission is blocked without showing the generic invalid	Fail	Medium
1. Fill email 2. Leave password blank 3. Submit	Password flagged, submission blocked	Fail	Medium
1. Click Login with nothing filled	Both fields show validation errors	Fail	Medium
1. Enter wrong password 2. Enter wrong password again	Still gets the generic error each time, account not locked yet	Pass	Medium
1. Enter wrong password a third time	Account locked due to multiple failed attempts. Please try again in 15 minutes.	Pass	Medium
1. Enter the correct credentials during lockout	Still blocked, lockout message shown again	Pass	Medium
1. Enter correct credentials	Login goes through normally	Pass	Medium
1. Fail once 2. Succeed 3. Log out 4. Fail once again	Counts as attempt 1 again, not attempt 2 — no carryover from before	Pass	Medium
1. Log in 2. Check browser console, localStorage,	Password never appears in plain text	Fail	Medium
1. Enter something like {' OR 1=1--} in email or password	Rejected safely, same generic error, no login bypass	Pass	Medium
1. Type the same email in uppercase 2. Enter correct password 3. Click Login	Still logs in (email shouldn't be case-sensitive)	Pass	Medium
1. Enter registered phone (11 digits) 2. Enter correct password 3. Click Login	Login succeeds same as email login	Pass	Medium
1. Open it from Past/Cancelled tab	No active Cancel option shows up	Pass	Medium
1. Open the booking	"Cancel Booking" is clickable	Pass	Medium
1. Open the booking 2. Hover the Cancel button	Button disabled, tooltip says "Cancellations are only allowed up to 24 hours before the	Fail	Medium
1. Try to cancel	Based on the ">24 hours" rule, should still be disabled — worth double-checking this is	Fail	Medium

1. Try to cancel	Button becomes enabled	Pass	Medium
1. Try to cancel	Still disabled	Fail	Medium
1. Click Cancel 2. Confirm in the popup	Status changes to "Cancelled", booking moves to Past/Cancelled	Pass	Medium
1. Click Cancel 2. Close/dismiss the modal instead of	Nothing changes, booking stays in Upcoming	Pass	Medium
1. Check that same time slot on the doctor's schedule	Slot shows as "Available" again, not "Booked"	Fail	Medium
1. Cancel one of them	The rest stay untouched in Upcoming	Pass	Medium
1. Open Upcoming tab	Empty state message, no errors or broken UI	Pass	Medium
1. Open Past/Cancelled tab with nothing there	Empty state shown	Pass	Medium
1. Note current state 2. Refresh (F5)	Same data still there (localStorage persistence)	Pass	Medium
1. Open "Past / Cancelled" tab	Shows past bookings and any cancelled ones	Pass	Medium
1. Open dashboard 2. Go to "Upcoming" tab	Only active, future-dated bookings appear	Pass	Medium
